W06-1: Spatial data visualization

Things you need for this worksheet

- R — the interpreter can be installed on any operation system. For Linux, you should use the r-cran packages supplied for your Linux distribution. If you use Ubuntu, this is one of many starting points. If you use Windows, you could install R from the official CRAN web page.

- R Studio — we recommend to use R Studio for (interactive) programming with R. You can download R Studio from the official web page.

- W05-1: Land cover classification

Learning log assignments

😕 Produce nice maps of your land cover classification

😕 Prepare nice figures and tables for your Story Map
